## Vydyne<sup>®</sup> 52BWMS polyamide 66

Vydyne 52BWMS is a medium-viscosity resin used for extrusion-compounding. It is the product of choice for low-yellowness-required applications. This product with its higher viscosity is a part of the 50BW/50BWFS series. It provides melt stability during the compounding step to maintain its flow. Resistance of Vydyne 52BWMS to heat, oil and wear is typical of PA66 neat resins.
