

Vydyne® 85XFS

polyamide 66/6 copolymer

Vydyne 85XFS is a general-purpose PA66/6 copolymer resin. It is available in natural and is designed for extrusion-compounding applications. This copolymer PA66/6 resin provides a lower melting point and can be used for compounding thermally sensitive additives or fillers. This resin offers a well balanced combination of engineering properties characterized by high strength, rigidity, good toughness, high melt point, good surface lubricity and abrasion resistance.

Vydyne 85XFS maintains the chemical resistance typical of PA66/6 to many chemicals, machine and motor oils, solvents and gasoline.
